Research Experience

UNIVERSITY OF WATERLOO | RESEARCH ASSISTANT

May 2022 – Present

DAVID R. CHERITON SCHOOL OF COMPUTER SCIENCE

- Researching and implementing algorithms for finite state transduction of k -automatic sequences into **Walnut**, a theorem proving software for automatic sequences, under the supervision of Professor Jeffrey Shallit.

UNIVERSITY OF TORONTO | RESEARCH FELLOW

May 2021 – April 2022

DAVID A. DUNLAP DEPARTMENT OF ASTRONOMY AND ASTROPHYSICS

- Developing a full-stack interface for hardware layout for the **Hydrogen Intensity and Real-time Analysis eXperiment (HIRAX)** using **JanusGraph**, **Flask** and **React**, under the supervision of Professor Adam Hincks.
- Researching and benchmarking ways to represent properties, connections, and changes to components in a **JanusGraph** graph database for efficient and intuitive querying.
- Research done in part during the **Summer Undergraduate Research Program** in the DADDAA, conducted in the summer of 2021.
